

Project Sprint Planning Notes

Team: Group 3

Sprint: 0

Date: 23/07/2021

Attended:

Scrum Master: Jared Song

Product Owner: Redowan Mahmud

Development team: Aili Gong, Alexander Aloï, Carl Karama, Shannon Dann

1. Goal

Complete all user stories with DOD's and Acceptance criteria for each one

Complete the initial wireframes for the website

Initialise base code and deploy initial web application.

Complete all documentation for the sprint, including the sprint retro for sprint 0 and planning for sprint 1, where user stories are allocated to each team member.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

All items on the product backlog will be created in preparation for future sprints.

All designs of user stories and wireframes are to be committed to the sprint backlog. This is done so that future sprints are easier to manage, and the product owner's design choices and preferred features are on the product backlog.

The product backlog will be available to present on Jira, with all user stories and tasks for sprint 0 displayed. Wireframes will be designed and presented using Figma in the form of screenshots.

Base code will be deployed to a static URL for users to access and will display a simple home page with a static login form.
